Web Font Combinations Cheat Sheet

Confused about which typeface families work well together? This cheat sheet provides font combinations three different ways:

1. **Web standard font**s that everyone has on their systems*
2. **Google Font API,** a free service*
3. **Typekit.com**, a paid font service

*Want to check to see how system and Google font combinations look on a web page and see them at different sizes? Try the handy Web Font Combinator tool:
http://font-combinator.com/
